

The Game of Lacrosse

For some reason the lovers of field sports have never made an attempt to introduce the game of lacrosse, a pastime very popular in New England and Canada, while the Indians play it with vim. It is a game requiring skill and speed and while the exercise is violent at times, yet no more so than a majority of out door sports. Lacrosse is played with paddles similiar in design to tennis racquets, but the game bears no more resemblance to tennis than it does to roller skating. It is football with paddles and is exciting and interesting.
